Collation

Microsoft recommends that you use a separate account for each SQL Server service.

Service	Account Name	Password	Startup Type
SQL Server Database Engine	NT Service\MSSQL\$SQL...		Automatic
SQL Server Launchpad	NT Service\MSSQLLaun...		Automatic
SQL Full-text Filter Daemon Launc...	NT Service\MSSQLFDLa...		Manual
SQL Server Browser	NT AUTHORITY\LOCAL ...		Disabled

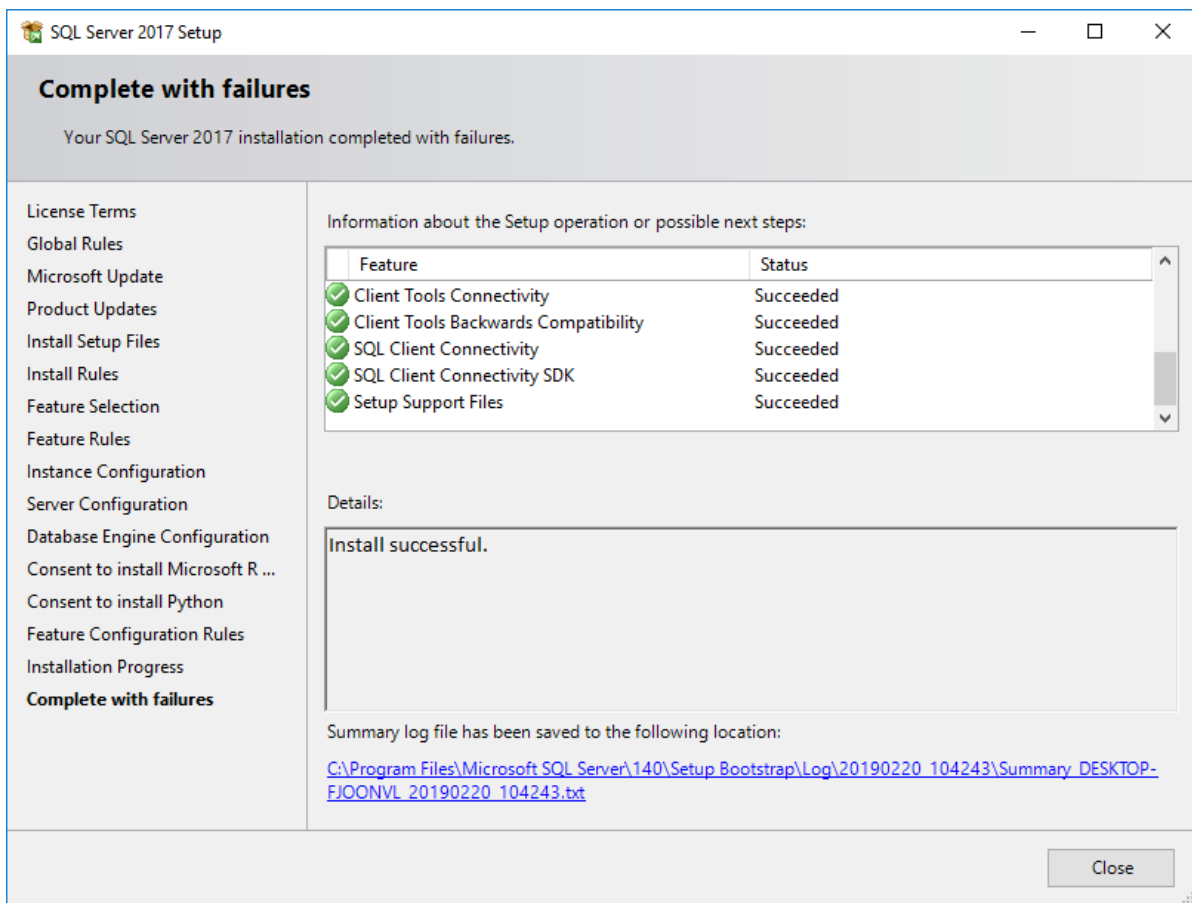

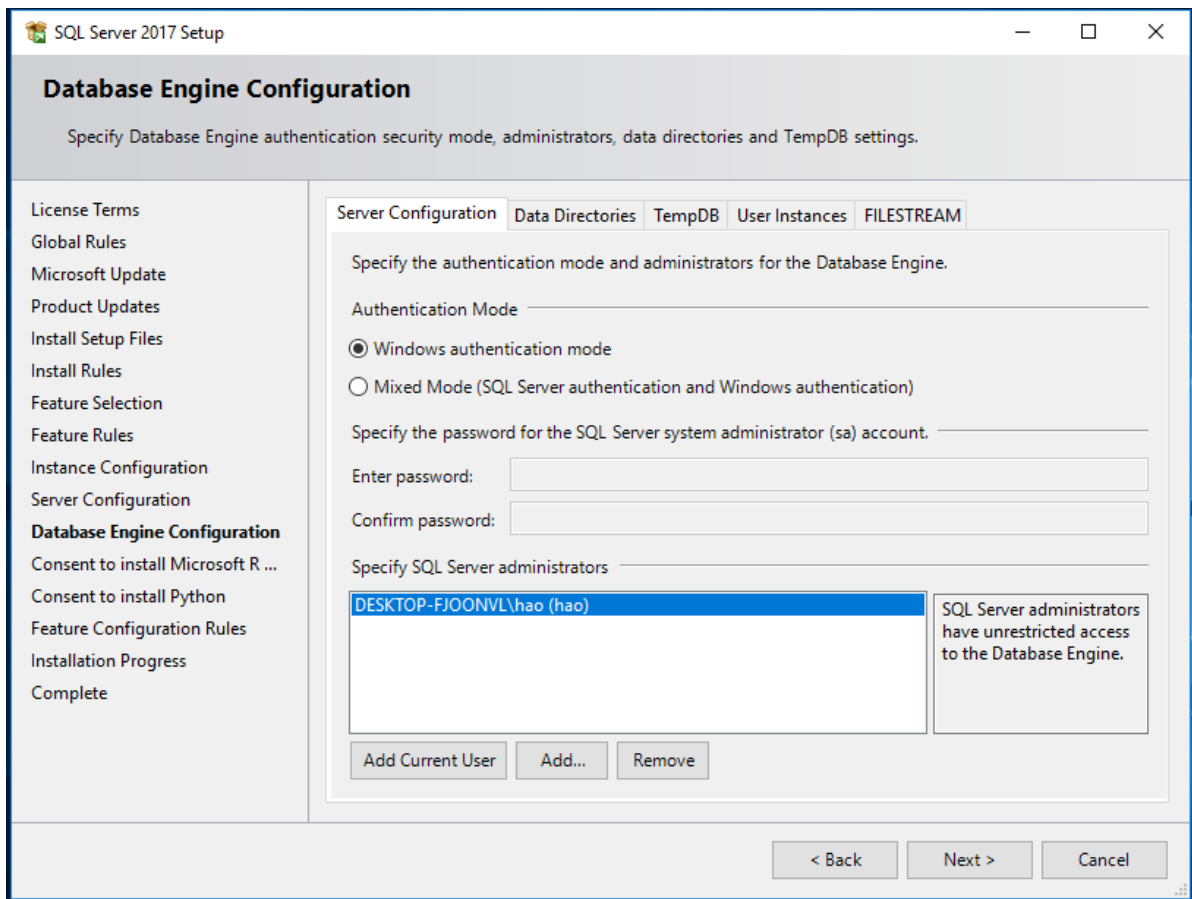

☐ Grant Perform Volume Maintenance Task privilege to SQL Server Database Engine Service

This privilege enables instant file initialization by avoiding zeroing of data pages. This may lead to information disclosure by allowing deleted content to be accessed.

5. After SQL Server Data Tools has been installed, open Visual Studio 2017.

After opening Visual Studio 2017, choose **File -> New -> Project**, from left sidebar, you should be able to find **Installed -> Business Intelligence -> Integration Services**, and create new project.

6. Open Microsoft SQL server Management Studio.

Choose server type as Database Engine, Appropriate server name and authentication as Windows Authentication. Click Connect. You should get an object explorer window. On drilling down, you can see various folders, one of which is databases.

7. NOTE

1. For MAC users, ask IT to install Windows or borrow a Windows laptop from UA library and perform above steps
2. If you use Visual Studio 2019, please refer this [link](#) to implement installation and tutorial.
3. If you are not able to find the instance name/ Server name to connect to database engine. Follow below steps:

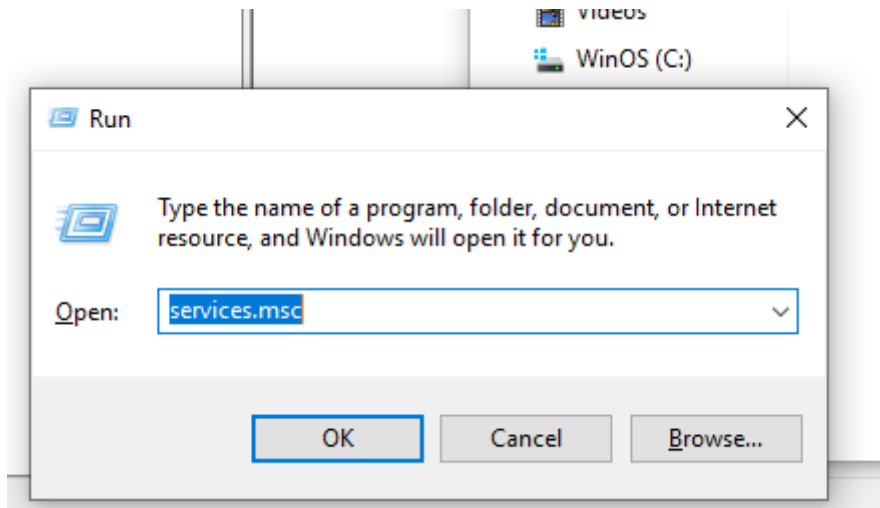

Navigate to:

Start->All Program->Microsoft SQL Server-> Configuration Tools-> SQL Server Configuration Manager->SQL Server services

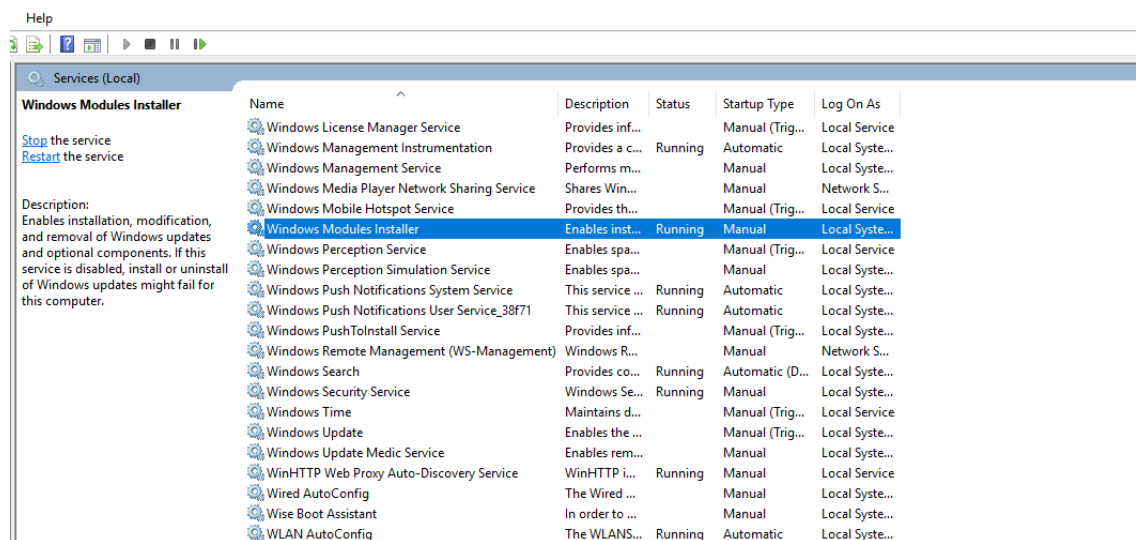

Verify the name of server instance. Check the state of Server instance. It should be in running state

4. If you encounter error when you install SQL Server Express, please check the service `windows module installer` is running as following:

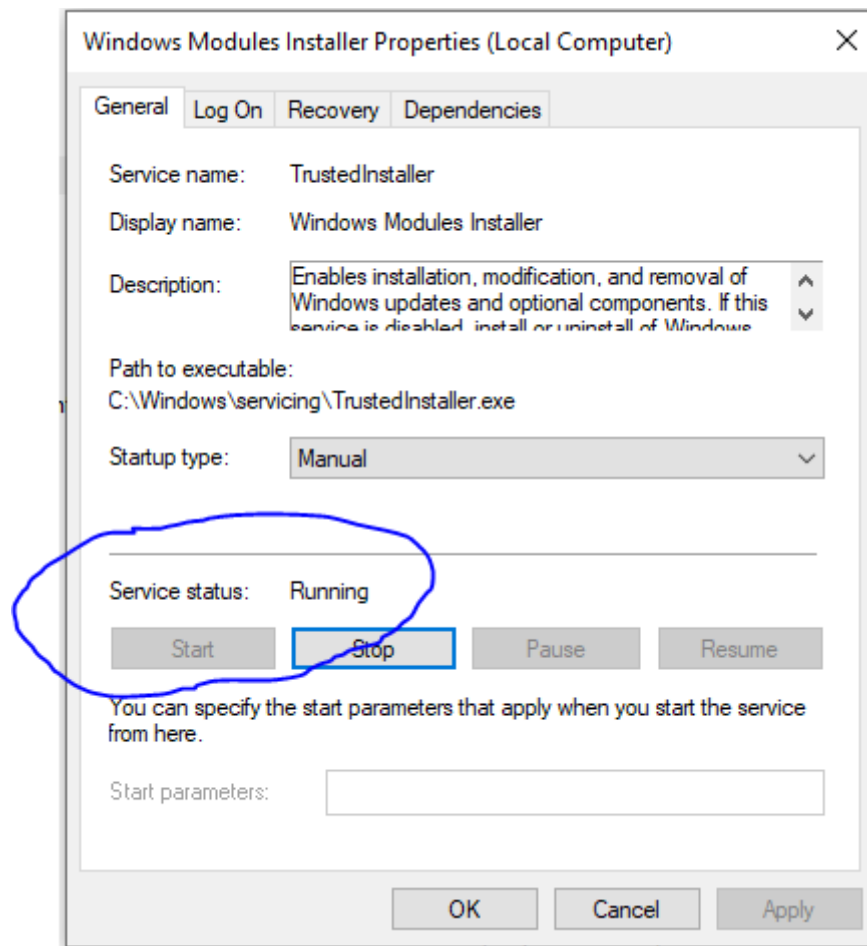

- press `win + r`, input 'services.msc'

- find the service `windows module installer` and double click

- make sure the `service status` is `running` or else click `start`.
